The Extension shown below applies to your Policy.

TERRORISM EXTENSION

Definitions

Denial of Service Attack

Any actions or instructions constructed or generated with the ability to damage, interfere with or otherwise affect the availability of networks, network services, network connectivity or information systems. Denial of Service Attacks include, but are not limited to the generation of excess traffic into network addresses, the exploitation of system or network weaknesses and the generation of excess or non genuine traffic between and amongst networks.

Hacking

Unauthorised access to any computer or other equipment or component or system or item which processes stores or retrieves data, whether the property of the Insured or not.

Territorial Limits

Great Britain (Meaning England and Wales and Scotland but not the territorial seas adjacent thereto as defined by the Territorial Seas Act 1987 not the Isle of Man nor the Channel Islands).

Virus or Similar Mechanism

Program code, Programming instruction or any set of instructions intentionally constructed with the ability to damage, interfere with or otherwise adversely affect computer programs, data files or operations, whether involving self-replication or not. The definition of Virus or Similar Mechanism includes but is not limited to Trojan horses worms and logic bombs.

Nuclear Installation

Any installation of such class or description as may be prescribed by regulations made by the relevant Secretary of State from time to time by statutory instrument being an installation designed or adapted for

- a) the production or use of atomic energy
- b) the carrying out of any process which is preparatory or ancillary to the production or use of atomic energy and which involves or is capable of causing the emission of ionising radiations
Or
- c) the storage processing or disposal of nuclear fuel or of bulk quantities of other radioactive matter being matter which has been produced or irradiated in the course of the production or use of nuclear fuel

Nuclear Reactors

Any plant (including any machinery equipment or appliance whether affixed to land or not) designed or adapted for the production of atomic energy by a fission process in which a controlled chain reaction can be maintained without an additional source of neutrons
